

# *Chairperson's Report 2005*

## South Petherton Recreation Ground

Definitely the best year ever with wonderful hot weather, a full music line up and the creation of the magnificent willow green woman.

The oak tree once again the focus of the event with its huge branches giving ample shade to at least six activities.

An Awards for All grant provided funding for an environmental arts programme which included wild stories, willow workshops, flower sculpture, giant puppets and music technology. The constant need to hire in equipment led to the decision to have a year's rest and plan for buying our own equipment for future fairs and to take other events.
